Language and work practice

Asker kommune — IKT · Started September 2025

A practice placement in the municipality's IT department, separate from the later consultant contract.

2024–2025 · Education

Data Engineering & Technical Education

We'RHERE IT Academy / independent learning · Course participant, with voluntary teaching contributions

Working with Azure data engineering concepts and contributing to technical learning initiatives, including programming, data literacy and emerging AI topics.

2023 · Project

Full-stack Python Developer / Collaborator

LLM-Based Quiz Application

Exploring learning applications using FastAPI, relational and graph databases, and large language models.

2022–2023 · Independent work

Freelance Webflow Developer

Cuix Agency / Architech

Turning complex visual specifications into responsive, interactive websites for international clients.

2022 · Employment

Junior Full-stack Developer

Seller Flash

Working across C#/.NET and Vue.js on an automation-oriented web application.

2021–2022 · Teaching

Python & JavaScript Instructor

Bilişim School · Around 500 video lessons and curriculum work

Teaching young learners, developing technical course materials and creating project-based programming content.

2021– · Independent work

Freelance Developer / Designer

Independent web development

Creating and improving websites for international clients through WordPress, Webflow and modern web technologies.

2020–2022 · 2024 · Teaching

Programming & Machine Learning Instructor

Blue Akademie

Teaching full-stack programming fundamentals and introductory machine learning to different learner groups.

2019–2020 · Employment

Part-time Developer

Software automation project · C#, MS SQL

Working on business-oriented desktop and database automation.

2018 · Education

.NET Framework training

Vektörel Bilişim · 180 hours

2014–2017 · Education

Mathematics studies

Middle East Technical University

Technical capabilities

Software: Python, FastAPI, C#, .NET, JavaScript, TypeScript, React, Vue.js

Data: SQL, PostgreSQL, MS SQL, Neo4j, Azure Data Factory, Azure Synapse, Microsoft Fabric

Platforms: Docker, Git, Cloudflare, SharePoint, REST APIs

Web: Next.js, HTML, CSS, WordPress, Webflow

Education

Middle East Technical University

Mathematics studies, 2014–2017

Vektörel Bilişim

.NET Framework training, 180 hours

Continuing professional learning

Courses in data engineering, machine learning and AI

Certifications

Microsoft Certified: Fabric Data Engineer Associate (DP-700)

Microsoft · Earned June 2025 · valid until June 2026

Neo4j Certified Professional

Neo4j

Additional learning

Microsoft Azure Data Engineering (10-course program) · Microsoft / Coursera

Mathematical Thinking in Computer Science · UC San Diego / Coursera

Supervised Machine Learning: Regression and Classification · DeepLearning.AI / Stanford Online · Coursera

Machine Learning with Python · IBM

Introduction to Artificial Intelligence (AI) · IBM

Generative AI: Introduction and Applications · IBM
